

Roaring Rockets

Build your very own rocket ship and watch it soar! Take a big breath and see how far you can make your ship fly!

Supplies:

- Construction paper
- Crayons
- Tape
- Straw
- Optional supplies to decorate the rocket ship include: glitter, glue, felts, stickers

Instructions:

1. Trace a rocket ship shape on construction paper. Use attached template or design your own.
2. Cut out rocket ship
3. Use your creativity to design your very own, unique ship. Use felts, crayons, glitter glue, stickers or any other craft supply to make your rocket ship out of this world!
4. Cut a rectangular piece of paper to fit on the back of the rocket ship
5. Create a pocket with tape on three sides (top and sides). Leave the bottom open so the straw can be inserted. The pocket should be *slightly* loose so the rocket ship can soar from the straw when it is launched. The sides and top should be completely sealed with tape so the pressure build-up from blowing with make your rocket fly.
6. Put your straw into the pocket
7. Blow into the straw and give it a burst of air and watch you rocket soar!
