

# Slime Recipes

## Classic Slime

### Ingredients

- Borax
- Warm water
- White school glue
- Food colouring (if desired)

### Instructions

1. Mix 1 tbsp of borax in 1 cup of warm water until dissolved and set aside
2. Pour ½ cup of white glue into the bowl
3. Add a couple drops of food colouring into the glue and mix thoroughly
4. Add 1 tsp of the borax solution to the glue and stir, keep adding a small amount of the borax solution at a time until you reach the desired consistency of your slime or until stretchy
5. Store in an airtight container for up to 6 weeks

# Clear Glitter Slime

## Ingredients

- Borax
- Warm water
- Clear school glue
- Glitter

## Instructions

1. Mix 1 tbsp of borax in 1 cup of warm water until dissolved and set aside
2. Pour 1 bottle (147mL) into a bowl
3. Add glitter if desired
4. Add  $\frac{1}{2}$  tsp of the borax solution and stir, keep adding the borax solution until you reach the desired consistency of the slime. Tip: you need much less borax solution when using clear glue than you would with white glue
5. Mix until you reach desired consistency of your slime
6. Store in an airtight container for a week for your slime to go completely clear

# Fluffy Slime

## Ingredients

- White glue
- Shaving foam (aerosol can)
- ½ tsp of fresh baking soda
- Food colouring
- Contact lens solution

## Instructions

1. Mix ½ cup of white glue with half a cup of shaving foam.  
Remember to shake the shaving foam before so your foam is fluffy
2. Add in ½ tsp of baking soda
3. Add in food colouring and mix well
4. Squirt 1 tsp of contact lens solution, keep adding contact lens solution until sticky
5. Mix with hands and keep adding contact lens solution until stretchy and fluffy
