

# Stethoscope Craft

## Stethoscope Supplies

- Red construction paper circle
- Medical symbol sticker or cutout
- Glue stick
- 2 pipe cleaners
- 2 ear plugs

## Stethoscope Instructions

1. Use the red construction paper to cut out a circle about 6cm in diameter
2. Take either your medical sticker or medical symbol cut out and glue stick and attach the medical symbol to the center of the red construction paper circle
3. Set aside
4. Take 1 pipe cleaner and fold in half. Take the other pipe cleaner and attach the end to the middle of the other pipe cleaner by twisting to form a "Y" shape.
5. Take the ear plugs and push each one onto the ends of the pipe cleaner that's folded in half to create the ear buds (parents made need to help with this step)
6. Finally poke a small hole into the red construction paper using the bottom end of the Y shape pipe cleaner, twist the bottom pipe cleaner around itself to attach
