

Beeswax Candles

Guide step 1

1.

Cut the beeswax sheet diagonally.

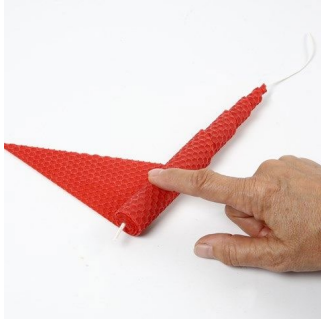

Guide step 2

2.

The warmth of your hands makes the beeswax more flexible, enabling you – with care - to fold the straight, short edge of the beeswax sheet around the candle wick.

Guide step 3

3.

Continue to roll the sheet carefully and tightly using the flat palm of your hand, making sure that the base of the candle stays straight all the way.

Guide step 4

4.

Rub the pointed end of the beeswax sheet into place on the base of the candle, attaching it with the warmth of your fingers.
