

Super Simple Origami Fish

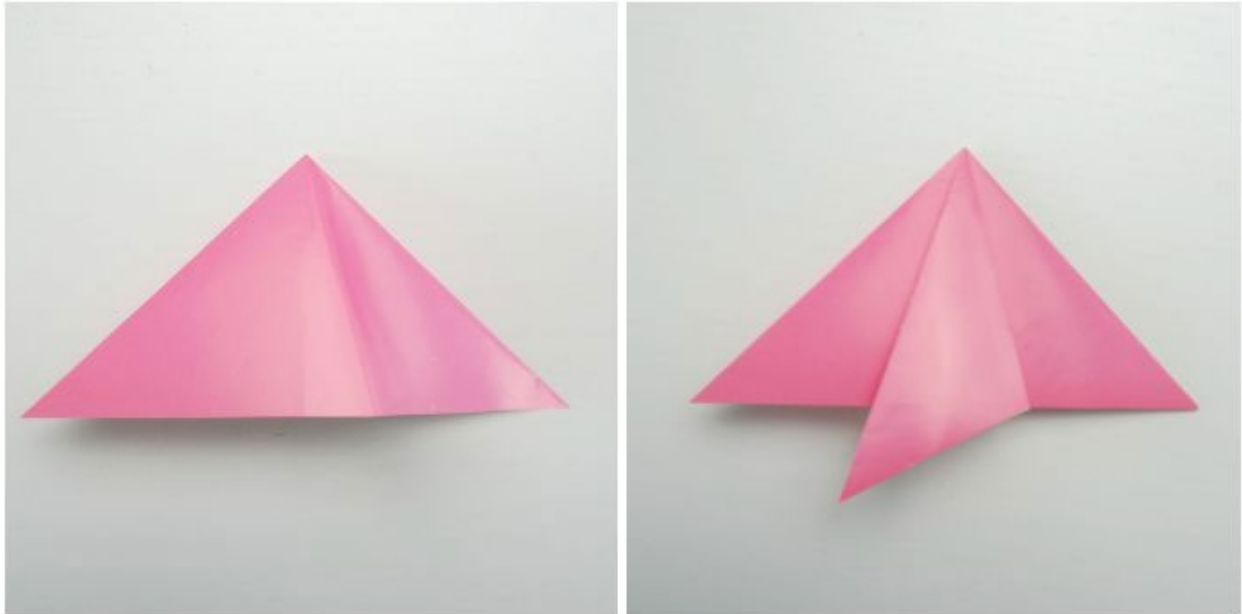

How to fold a simple origami fish

What you need;

Start by folding a square piece of paper diagonally (both sides) and in half (one side) – crease and unfold as shown on the first image above.

Hold the paper as indicated with blue spots and fold towards the center to get a triangle shape.

Now hold the right bottom corner of the triangle and fold it toward the center along the crease shown on the first image above. Do the same with the other corner – we got fish tail!

Poke a small hole in the top fin.

Thread a string, thread, or fish line through the hole, 6 - 8 inches long.

Cross the two straws and tie tightly in the centre.

Hang the fish from each arm of the \oplus and one in the middle.

A sample folded fish is provided.
